Manikanta Madhavan S

Hassan, Karnataka | bettafish505@gmail.com | +91 9036261608 | LinkedIn | GitHub

Summary

Computer Science Engineering undergraduate at Government Engineering College, Hassan experienced in full-stack development, applied cryptography, and AI solutions. Demonstrated record of building functional platforms including exam planners, AI tools, and desktop security software, supported by strong fundamentals in system design and data structures.

Education

Government Engineering College, Hassan — Hassan, Karnataka
Bachelor of Engineering in Computer Science and Engineering – ***CGPA: 8.36 / 10.0*** — *2023 – 2027 (Expected)*

Technical Skills

Languages: C, C++, Java, Python, JavaScript, HTML, CSS
Frameworks & Libraries: Next.js, React.js, Node.js, Express.js
Databases & Developer Tools: MongoDB, PostgreSQL, MySQL, REST APIs, Git, GitHub, VS Code
Core Competencies: Full-Stack Development, Applied Cryptography, System Design Fundamentals, OOP
Spoken Languages: English, Kannada, Hindi, Tamil

Experience

Head of Technical Operations — 2025 – Present
ISTE GECH — *Hassan, Karnataka*
– Lead technical infrastructure, deployment setups, and operational planning for student chapter initiatives.
– Mentor peers in web technologies and algorithm problem solving; organize student hackathons and workshops.

AI Intern — Jan 2026 – Feb 2026
Mirai AI — *Remote*
– Developed automated pipelines and integrated Retrieval-Augmented Generation (RAG) workflows.
– Benchmarked and implemented machine learning and deep learning models for operational automation.

Student Partner — 2024 – 2025
Internshala — *Hassan, Karnataka*
– Represented GECH Hassan to connect engineering students with technical internship and skill development programs.

Projects

Prep AI | *Next.js, AI Integration*
– Architected an AI-driven preparation platform to streamline interview practice, mock tests, and structured revision.
– Engineered performant frontend routing, dynamic state management, and optimized response delivery for user feedback.

My Gate Planner | *Next.js*
– Built an interactive study tracking web application to manage GATE syllabus milestones, schedules, and daily targets.
– Designed modular UI components to render multi-level topic hierarchies and track real-time completion progress.

Data Centric Security System + Data Shredder | *Python, PyCryptodome*
– Engineered a desktop security utility utilizing AES encryption algorithms to safeguard local files and directories.
– Implemented a multi-pass secure file shredding algorithm overwriting raw disk patterns to prevent data recovery.

Airbnb Clone | *MERN Stack (MongoDB, Express.js, React.js, Node.js)*
– Developed a full-stack rental marketplace supporting user authentication, listing creation, and booking management.
– Designed RESTful API endpoints coupled with MongoDB schemas for high-efficiency data querying and persistence.

Achievements

Selected – VBYLD Stage 3 (State Level): Viksit Bharat Young Leaders Dialogue (2025/2026)
Organizer & Mentor: GECH HackSprint 2.0 (2025)
Finalist: NAVKIS Engineering College Hackathon (2025)
Finalist: GECH HackSprint (2024)
